

God gave us...

*Plant a Seed! Sow a Soul!*

# “Parsley” (Petroselinum crispum)

Planting depth: ¼”

Apart in row (after thinning): 3”-5”

Distance between rows: 24”-30”

Approximate days to germination: 14-28 days

---

## ♥ Let's grow...

Plant parsley seeds ¼” deep in a sunny area of your garden. It takes about 14-28 days for the seeds to sprout into seedlings. Seedlings are new plants grown from seeds.

## ♥ Taking care of God's creation...

New plants need regular watering and weeding. Thin the seedlings to 3”-5” apart. Parsley is a plant with many green leaves and stems that you can eat.

## ♥ Eat your parsley...

Parsley was first grown in the Mediterranean region nearly 2,000 years ago. Parsley is a good source of vitamins needed for healthy bodies. You can show God's love to others by sharing the good food that he has given us to eat.
