

14 – How do we take care of our newly planted seeds?

14 – How do we take care of our newly planted seeds?

- Make sure they get lots of sunshine. The sun helps a plant make the food it needs to grow.
 - Make sure they have enough water, but not too much.
 - Make sure they are protected from wind, animals and anything else that can damage them.
 - Then the young new plants will be able to develop roots and grow strong!
-

God's Word: ⁶ As you received Christ Jesus the Lord, so continue to live in him. ⁷ Keep your roots deep in him and have your lives built on him. Be strong in the faith, just as you were taught. And always be thankful. Colossians 2:6-7

*How do we take care of our growing lives in Christ? We love God, love our neighbor, trust God to protect us, and always be thankful! Can you think of some other ways?

Activity: On Activity Card Ls. 14 have the children draw plants above each fruit of the Spirit. On the leaves of the plants, write some ways to show that fruit in your life. For example, on a leaf of the Goodness plant, you could write, "Obey my parents."

LOVE
